Journal of Sports Sciences, 2001, **19**, 983–988

Subject index

aerobic power, fitness, Gaelic football, injuries, skills, task analysis, 181
aerodynamics, baseball, estimation, lift, spin, 349
affect, motivation, self-talk, 469
age, education, health promotion, odds, sedentary, self-perception, 279
age, muscle stiffness, torque–joint angle relationship, 875
age banding, association football, maturation, talent identification, 677
ageing, endurance running, females, males, orienteering, 243
analogy learning, implicit learning, motor learning, table tennis, 307
anthropometry, body build, females, juniors, rowers, 195
anxiety, confidence, debilitators, facilitators, feeling states, 385
arterial oxygen saturation, dietary sodium, exercise-induced bronchoconstriction, 865
association football, maturation, talent identification, age banding, 677
asymmetry, footedness, soccer, World Cup, 855
athletes, erythropoietin, maximal oxygen uptake, simulated altitude, 831
athletic world records, forecasting, scaling laws, 477
athletics, projectile, release angle, shot put, sports biomechanics, 359
attitudes, perceived behavioural control, Theory of Planned Behaviour, 711

baseball, estimation, lift, spin, aerodynamics, 349
bioenergetics, biomechanics, running, sprinting, 701
biomechanics, fastball, pitching, throwing, 665
biomechanics, gait, joint moments, inverse dynamics, 263
biomechanics, heading, kinetics, soccer, 171
biomechanics, running, sprinting, bioenergetics, 701
blood lactate, cycling, muscle temperature, 693
blood lactate, heart rate, high-intensity running, intermittent training, time–motion analysis, 881
blood lactate, monitoring guidelines, running speed, stroke quality, tennis practice, 235
blood lactic acid, children, heart rate, match analysis, soccer, 379
body build, females, juniors, rowers, anthropometry, 195
body size, football, morphology, somatotype, 253
body temperature regulation, dehydration, endurance, marathon, prolonged exercise, 845
book reviews, 299
bootstrapping, consistency, measurement, test–retest reliability, validity, 273

cardiorespiratory stress, localized neuromuscular fatigue, total work done, 955
catecholamines, cortisol, exercise, growth hormone, hypnotic compounds, prolactin, sleep deprivation, 89
causality orientations, exercise, multi-trait multi-method analysis, self-determination, 445
chalk, coating, coefficient of friction, grip force, magnesium carbonate, rock climbing, rock surfaces, 427
children, heart rate, match analysis, soccer, blood lactic acid, 379
children, isokinetic leg strength, multi-level modelling, thigh muscle volume, Wingate anaerobic test, 141
choking, cricketers, qualitative, 'yips', 937
clinical psychology, exercise, perceptions, therapy, 433
coating, coefficient of friction, grip force, magnesium carbonate, rock climbing, rock surfaces, chalk, 427
coefficient of friction, grip force, magnesium carbonate, rock climbing, rock surfaces, chalk, coating, 427
Communications to the Annual Conference of the British Association of Sport and Exercise Sciences (BASES), 3
